

REISSUE APPLICATION DECLARATION BY THE INVENTOR

Docket Number (Optional)

438P776 R

I hereby declare that:

Each inventor's residence, mailing address and citizenship are stated below next to their name.

I believe the inventors named below to be the original and first inventor(s) of the subject matter which is described and claimed in patent number 6,588,302, granted July 8, 2003 and for which a reissue patent is sought on the invention entitled Orbital Blade Coaxial Cable Cutter/Stripper,

the specification of which

☒ is attached hereto.

☐ was filed on _____ as reissue application number _____

and was amended on _____
(If applicable)

I have reviewed and understand the contents of the above-identified specification, including the claims, as amended by any amendment referred to above.

I acknowledge the duty to disclose information which is material to patentability as defined in 37 CFR 1.56.

☐ I hereby claim foreign priority benefits under 35 U.S.C. 119(a)-(d) or (f), or 365(b). Attached is form PTO/SB/02B (or equivalent) listing the foreign applications.

I verily believe the original patent to be wholly or partly inoperative or invalid, for the reasons described below. (Check all boxes that apply.)

☐ by reason of a defective specification or drawing.

☒ by reason of the patentee claiming more or less than he had the right to claim in the patent.

☐ by reason of other errors.

At least one error upon which reissue is based is described below. If the reissue is a broadening reissue, such must be stated with an explanation as to the nature of the broadening:

The error arose through failure of the applicant (and/or his attorneys) to recognize that the invention encompasses one or more blades in addition to the single blade with a circular cutting edge moved in an orbiting path about the workpiece, as recited in claim 1 of the patent and incorporated by reference in claims 2 through 5. The invention, and thus the claims defining it, encompasses any blade movable to cut at least partially through the covering layer on the workpiece in combination with a pair of members which are reciprocally movable between first and second positions wherein edge portions of the members are spaced from, and forcibly engage, respectively, the covering layer.
